

IRTDA - CORRECT DIVING

Diving center directly on the beach

- Diving courses all the way to the instructor level
- Reef with 6 steep walls
- 70 places to dive
- Half and whole day boat trips
- Diving safari and expeditions in the whole Adria
- Submarine trips for max. 3 people
- Rent-a-Kayak and archery
- Marine biology station
- Travel agency Kvarnerline

...at home in nature!

Dear Correct Diving guests, dear Correct Diving friends!

Active vacation is getting more popular every day. Modern guest doesn't want just to lay on the beach and enjoy good food, but to participate in activities that will help him to relax and enjoy in nature – together with his friends or family.

Correct Diving is located on the market since 1993, recognizing this need as the first diving center in the Mediterranean.

Faithful to the motto: Nature's Best Wellness! we offer individual programs based on customers need.

The guests recognized our unusual ways, and for that, they keep coming back to us for years! Today we offer a variety of activities, which are intended for embellishing the most important time of the year - and it is a good ratio of price /service.

It is also recognized by many tour operators, so it is not surprising that we appear in many guides in the sections "advice" or "visit", for example: Marco Polo edition Kvarner 2012.

Today you are among the lucky ones, who will be with us to book an unforgettable holiday and enjoy the beautiful nature.

Send us your request and we will make you an offer you won't be able to refuse!

1. Rent-a-Kayak and equipment
2. Equipment rental
3. Reception/Check-in
4. Equipment rental
5. Wet room
6. Compressor room
7. Filling station Air/Nitrox/Trimix
8. Service room
9. Terrace for 72 people
10. Wet room - diving center equipment
11. Wet room for groups
12. Classroom for 24 people
13. Archery range
14. Beach volleyball
15. Marine biology station for 100 people
16. Beach bar
17. Massage station
18. Store
19. Fruits and vegetables
20. Rent-a-Kayak

The services of our diving center

- The base is located directly on the beach on over 2500 m² with free parking places
- Diving center with a place to camp (www.kamp-Glavotok-hr)
- Reef with 6 steep walls – on each entrance is a table with description of the location
- NO-LIMIT reef diving (daily and weekly tickets)
- Whole day and half-day excursions from boat or land
- Daily boat dives on our own diving boat
- Diving safaris and expeditions on our 30-meter ship for max 12 guests
- Equipment rental from snorkel to double equipment
- Filling station for 200 to 330 bar for air, Nitrox, and Trimix
- Large storage facility with 18 bottles of 50 L x 330 bar air
- Breathing air control for moisture during the filling process
- Training platform for apnea diving
- 100 m² event tent with seats for up to 100 People.
- Sunny terrace with sea view for 72 people
- Teaching area with sea view (boat & dive house) with seats for up to 24 people
- Beach bar next to the base with places to seat for up to 80 people
- Massages with standard and medical massages
- Underwater training parkour
- Underwater learning park

Strong compressor system with big air banks

Our housereef with 6 steep walls

Professionalism separates us from the rest

Our base is located directly next to the beach on area of 2500 m².

Connected to our house reef with six steep walls you have a great place for your diving-holiday experience.

Our young and friendly team speaks several languages and will help you during your stay with us. The modern, supervised filling system ensures a quick delivery with clean air. We also offer other gases and mixtures such as NITROX, TRIMIX, ARGON, OXYGEN.

Our bay is protected from the wind and therefore safe for diving and snorkeling excursions to the best and most breathtaking locations.

On the house reef, in the shallow water you will find a buoyancy course and a underwater learning park that will guide you and also allow you to relax in the water and / or continue to train. The shallow area for training is 1.5 to 6 meters deep, and allows an ideal entry for all divers, and the steep walls at depths of 12 to 40 meters will make the experienced divers among you happy too.

For more distant dive locations (a total of 70 spots at a distance from 15 min to 1.30 h) we offer transfer with our own ship, or with ship from our partner (from 12 to 30 people).

Our diving and snorkeling boat is hand designed and built so that your stay is as comfortable as possible.

Diving safari ship Adria Explorer - Pipi

Our excursion ship Sv. Petar

Trip in nature

Top spots for snorkeling and diving

The Kvarner Bay is one of the most famous diving reefs in the Mediterranean.

It shines with:

- Steep walls, rich in vegetation as in many tropical diving sites
- Wrecks, suitable for all dives
- Caves with fantastic vegetation
- Dropoffs
- Tunnels and many other sightseeing locations

The advantage with us is that we have these great places within a couple minutes up to 1.30 h boat trip. The words are not enough to explain everything - so here are some photos of the shipwrecks:

Lina (min. 20 m - max. 55 m)

Elhawi Star (min. 26 m - max. 42 m)

Peltastis (min. 6 m - max. 33 m)

Vis (min. 45 m - max. 60 m)

Sigrid (min. 20 m - max. 32 m)

Services offered by our diving school:

- Modern diving training according to the latest standard, approved by the ministry of education and sports
- Theory with internet training and classical theoretical classes
- Underwater parkour course at 3 - 9 meters depth
- Diver orientation program - from 10 years of age
- Snorkeling classes for beginners from 8 years
- Refresher courses for divers who were not diving for a long time
- Courses from beginners to instructors
- Education and training for instructors
- All specialty courses
- Recreational and Technical Diving Courses
- Apnea courses and training
- Technological seminars for beginners and advanced divers
- Compressor seminars from beginner to service technician (Manufacturers certified)
- Diving seminars and training
- MFA and oxygen courses for laymen and instructors
- Divemaster and instructor training for the professional career

Diver orientation program from 10 years of age

Ideal and relaxing learning surroundings

Diver Orientation Program

IRTDA DOP

You want to see the world from a different perspective and you are not sure if you would feel comfortable under the water? Then go for a test dive. After your first try, you will be certain of your decision.

After the theoretical instructions by our professional instructors, you will go directly to our house reef. Here you will get the feeling for breathing and gain your first impressions of weightlessness under water.

We organize diver orientation programs every day.

Happiness while learning is one of our main goals

Start with your begginer training

Open Water Diver (OWD)

This course is the beginning of the education and provides the diver with all necessary (basic) skills and skills that he needs to have underwater for safe and controlled diving. The course is modular. After graduating the course, you are entitled and capable of organizing your own dive and you will receive the internationally recognized certificate. The course consists of 5 theoretical and practical units, followed by 4 dives in the open water and additionally an independently planned dive.

Requirements:

- Medical certificate for diving
- At least 10 years of age

Refresher course

Haven't dove in a while?

Then you should take part in one of our "We make you fit again" courses. Theoretical and practical exercises provide safety and routine for handling the diving equipment.

Further education

Advanced Open Water Diver (AOWD)

Next course for all participants of the OWD course. The AOWD course will show you a new side of diving and you can further improve your already learned skills. Here you will learn techniques of navigation, depth dives, night diving and searching and recovering. This course shows you the more challenging sides of the dive.

Prerequisites:

- MFA - Brevet
- We recommend min. 16 dives in the logbook

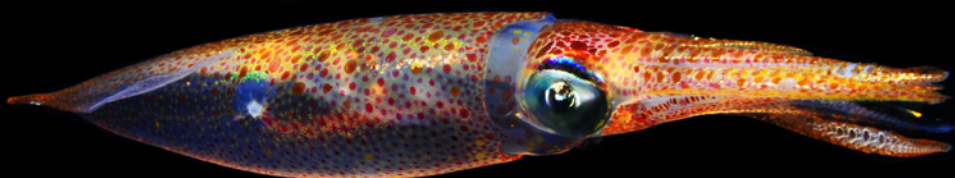

Rescue diver

IRTDA RD

The Rescue Diver course improves your ability in case of danger or the difficulties that you or your dive partners encounter while diving. In-depth lessons will cover topics such as stress during diving, self - help, first aid and applied dive medicine, CPR, search for an unfortunate diver, organization and rescue measures at the scene of the accident. A must for every responsible diver.

Requirement:

- AOWD licence
- Min. 35 dives

The Divemaster Course

Divemaster

Divemaster training is your step towards professional diving. In this course, you will polish your skills for the organization of dive events as well as effective participation in the training. Your skills in theory and practice will be raised to a professional level. The divemaster course creates the prerequisite for a "career" as an instructor. Just this course is a foundation for a professional career. We organize this course within four weeks and combine it with other activities in our base. This is to ensure that the theory and practice can also be implemented in daily basic operation.

Our Divemaster candidates will receive daily training and briefings so they can become better and more professional divers.

Prerequisites:

- Rescue Diver license, we recommend at least 70 logged dives

Program for collecting experience

If you want to gain experience in the diving industry and want to get assistance with the job search, Correct Diving - with more than 25 years of experience in the diving sector - is one of the best places. As a certified divemaster or dive instructor, you become during the four to max. eight weeks of the Correct Diving program you are presented with the unique opportunity to do everything you have learned in a real work environment. You will work with experienced instructors and will be trained for the daily tasks.

Tasks of the program:

- Check-In Tasks
- Transfers, welcome and farewell, equipment, preparation of crew lists, check-in / out
- Boat management and logistics, preparation of boat exits, permits, safety equipment, port procedures, dealing with the boat crew
- Diving management: legal requirements, diving lettering, supervision of dive groups and procedures on the boat according to IRTDA and Correct Diving regulations
- Customer relationship: introductory lettering, sales, customer complaints, procedures and industry standards IRTDA and Correct Diving standards, school curricula, assisting with diving courses or advanced courses
- Certification procedures
- Active experience in compressor handling and filling of bottles (air and nitrox)
- Maintenance and care of the equipment
- Other tips and tricks of the diving business
- Job Search: Diving CVs, contacts, what managers are looking for

I.R.T.D.A. ITC

The Assistent Instructor course

Further preparation for the instructor. In here the focus is on the presentation of technology and the organization of practical training. Get diving lessons under visual observation of our professional instructors.

Requirements:

- Divemaster licence
- 90 logged dives

Instructor Training Course

Your entry into the Professional Instructor career. In this course, we will prepare you in 10 days for your IE (Instructor Examination). After successfully passing you are on the freediving market as an IRTDA ROW instructor and may teach the following courses:

- Open Water Diver
- Advanced Open Water Diver
- Rescue Diver
- Divemaster
- Assistant Instructor Course

You can take this course every month. We will send you dates on request.

Requirements:

- Min. Divemaster license
- 120 logged dives
- MFA and OP license not older than 2 years
- Medical certificate for diving

MINISTRY OF EDUCATION AND SPORTS

Pursuant to Article 7, paragraph 2, Article 9 of the Sports Act (Official Gazette no. 111/97, 13/98 and 24/01), Article 3, paragraph 2, Article 7 and Article 9, paragraph 2 of the Technical Culture Act (Official Gazette no. 76/93 and 11/94) I hereby issue the

ORDINANCE

ON AMENDMENTS TO THE ORDINANCE ON REQUIREMENTS FOR CARRYING OUT DIVING TRAINING AND SPORT AND RECREATIONAL DIVING TRAINING

Article 1

The list of international diving organizations whose identity cards or licences are recognized in the Republic of Croatia, which is appended to the Ordinance on the Requirements for Providing Diving Training and Sport and Recreational Diving Training, is being amended as follows:

In item 1, number 5, after the word item is replaced by number "4."

Item 2 shall be supplemented by:

"IRTDA (International Recreational and Technical Diving Association)

UDI (United Diving Instructors)

UEF (Underwater Explorers Federation)."

Article 2

This Ordinance shall enter into force on the day of its publication in the "Official Gazette".

The Speciality Program

is extremely important for every diver to improve his diving skills.

You can improve the things that you or your instructor find necessary. Here you get a small sample of the 26 programs that you can take with us. Some programs are partially important for your further career as an instructor and even mandatory in some countries. Isn't it great to go on a vacation and have stress-free learning conditions? We look forward to your visit.

Night Diver

Look at the sea in another light. As an introduction to underwater nightlife the special course, night diving, teaches you communication techniques and navigation in reduced visibility. You will learn special procedures and know your equipment for planning and execution of night dives. The special course, night diving, gives you confidence for diving in darkness.

Perfect buoyancy control

Have you ever asked yourself how is it possible that your diving guide is motionless hovering over the reef? In the special course, perfect buoyancy control, you will learn to equip yourself with the right amount of weights to ensure optimal control, and to obtain equilibrium and balance. Then you will be able to ascend and descend effortlessly, streamlined, efficient and graceful in the water. Since you are often in the immediate vicinity sensitive coral reefs, it is very important not to damage it and to avoid injuring yourself.

Nitrox Level 1

You can dive safer because your body absorbs less nitrogen than when diving with normal air. Ideal for dives in cold waters. Furthermore, Nitrox shortens surface pauses between two consecutive dives. The course lasts approx. half a day.

Nitrox Level 2

This builds on Nitrox level 1 and increases diver's advantages of Nitrox dives. The participant learns the null time in which can remain in the deep. This is an ideal preparation for wreck dives, and allows the diver to dive with a max. Nitrox mixture of 40%. The course takes about one day.

Medic First Aid

The MFA course is a prerequisite to participate in an IRTDA Advanced Diver course. In this course which lasts two days, you will learn, in addition to basic first-aid techniques, resuscitation techniques such as heart-lung massage and mouth-to-mouth technique.

Deep Diver

Learn to plan and perform deep dives securely. This course treats topics such as the use of special equipment, avoiding Nitrogen narcosis, preventing decompression sickness and more correct dealing with possible problems. It is a very helpful special course and is recommended to all those who go deeper or want to do technical dives. The special "deep dive" is an ideal preparation for wreck dives, e.g. the Lina.

Digital Underwater Photographer

This course allows you to make the most out of your underwater camera. In the special course, you will learn how to use all the advantages of digital technology and capture the underwater world perfectly with your camera.

Navigation Diver

This course allows you to improve and refine your underwater navigation. A course that is used for each diver to safely reach the course exit through the targeted navigation. Duration of the course is 1 day.

Oxygen Provider

The OP course is a must for all divers. Here you will learn the basic techniques to recognize divers with a pressure-related accident and to guarantee a fast oxygen supply until the emergency physician arrives. The course duration is only 1/2 day.

Tec diver

Correct Diving offers you Tec training courses in the areas of wreck, cave, and deep dives.

Tec diving must be properly learned. Only then is it safe and can be really enjoyed. Correct Diving has been a training center for divers and instructors since 1997 in Tec Diving. It's not the variety of divers that is important, but the quality of training and your content. With us, you have experienced instructors at your disposal and we guarantee you:

- Training in small groups
- No tec diving mixed with sports or amateur diving

- Dates according to your wishes and your time
- Free tuition during the course
- Subsequent Tec entry by our tec team
- Training throughout the year
- Before you register, you will receive detailed advice on courses and the necessary diving equipment free of charge

TEC Deep Diver

Do you want to go beyond the limits of normal sports diving? Any dive outside the no-decompression limit means an increased risk of decompression sickness, here a small error, for example of the diving computer, would be fatal. The TEC Deep Air Diver course allows you to approach the decompression dive under safe conditions and to carry it out safely. In this course, you will learn the basics of TEC diving and optimize your dive and dive techniques step by step.

During the course of 4 days, you will be taught theoretical and practical diving skills, which will allow you to reduce the diving risk to a minimum.

Advanced Tec Deep Diver

Take the step in a different diving experience, with more time, more depth, more equipment, and safety, and become advanced TEC diver. In this course, you will build on your learned basics of the TEC Deep Air Divers and learn more optimized deep diving techniques using air, nitrox, and oxygen. Here starts your new adventure. This is the only way to realize your dream and, by completing this course, take a final step towards Trimix diving.

Adria Explorer

The diving with Adria Explorer on the m/y PIPI

The port of departure and destination is the port of Glavotok or Pinezic on the island of Krk. From there we go in south or north direction past many islands of Croatia, which offer very interesting and varied diving experiences for both beginners and advanced divers. These include dive sites with wrecks, caves, tunnels, and cliffs with unique flora and fauna. We offer you several standard routes that were thematically designed. Here we would like to introduce you to three routes. But an individual trip according to your wishes is no problem for us.

The pleasant water temperatures, the crystal-clear water shining in different shades of blue, as well as the almost unbelievable good visibility are just a few highlights of the journey. Numerous picturesque bays, small town harbors with a Mediterranean flair and numerous attractions, offers you many positions to sleep while anchored or at the city pier.

The cabins are very luxurious. All are air-conditioned for the trips in the warm days and equipped with heating for the trips in winter. In all cabins are bunk beds. In four of the six cabins, the lower bed is wide enough for two people to sleep in.

In the salon, the food is served. It also serves as a function room if you, for example, want to share your great pictures with your fellow travelers or have a celebration. The salon has the following amenities: a flat-screen TV, a bar with fresh draft beer, a HiFi system, two large tables, internet with WIFI, air conditioning and heating.

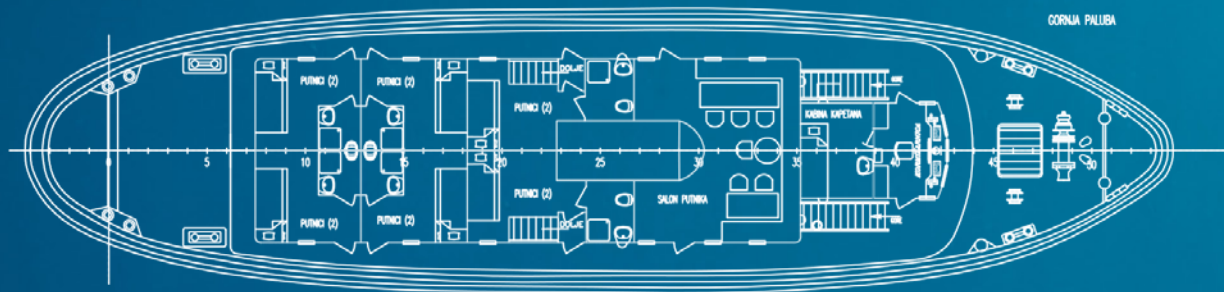

The service on board is always full board and included in the price. For diving groups, we have developed a catering package, which is adapted for the diver's needs. Full board consists of breakfast with hot drinks, lunch, and a hot dinner. Water, afternoon coffee, and tea are free during the entire journey.

Important ship data

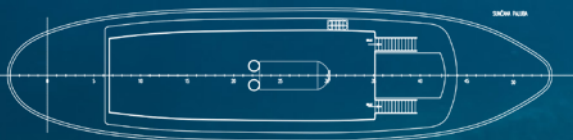

Name	m/y Pipi - Adria Explorer (M57)
Built by	Shipyard Split
Length	30,20 m
Width	7,92 m
Motor	One motor Caterpillar 800 HP
Electricity generator	Three generators each with 40kW – 50 kW and 100 kW power
Electricity	220 V, 380 V, 24 V
Diesel tanks	30000 l
rpm	1200 max
Cruising speed	9 kts/h
Top speed	12 kts/h
Consumption at	Daily consumption of diesel 250l at two hours drive.
Freshwater capacity	25000 l
Safety	ICE -
Passenger cabins	Six comfortable double cabins on the upper deck with shower and toilet, air conditioning, heating, fire alarm, 220 V - sockets and storage space. A window in each cabin provides enough fresh air and sunlight.
Crew cabins	four double cabins are in the lower deck
Navigation	GPS, RADAR, VHF-DSC, LOG, LOT, Chartplotter, NAVTEX – ACE Ship
Salon	With 2 seating groups and a bar
Toilets / Showers	Two toilets / showers on working deck
Divers supply	Two compressors a 315 l / min together 630 l / min. Storage tanks (air bank), cascade panel. Air, Nitrox, Trimix, Helium, Argon
Supply	All 6 tanks are simultaneously felt.
Diving tanks	18 x 15 Liter steel, 12 x 80 f3 Tanks aluminium
Sundeck	ca. 70 m ²
Dive and work deck	ca. 100 m ²
Bathing and diving platform	With 2 diving ladders ca. 8 m ²

Cabins deck for the guests, each with their own shower and toilet. Four cabins with wide beds for couples. Salon for guests. Everything is air-conditioned and equipped with heaters.

Side view of the ship over all decks.

Sundeck with deck chairs, partly covered with an awning. The sundeck is approximately 70 m².

Working and diving deck, compressors, storage, diving equipment, crane, toilets and showers, crew room, kitchen, storage, dinghy and space for the submarine. The whole deck is about 100 m².

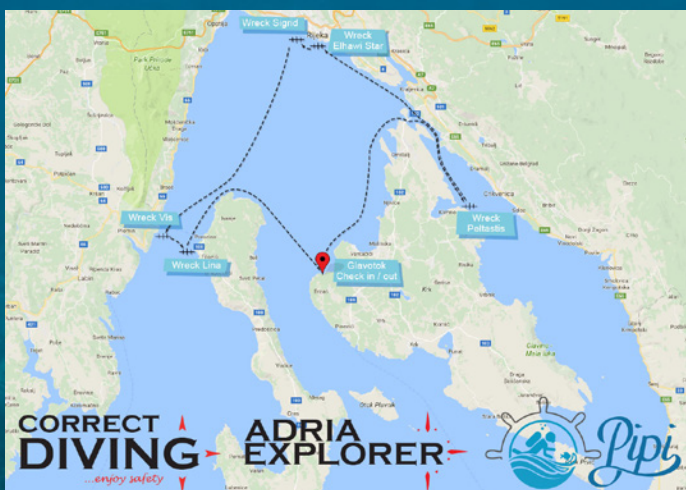

Hull of the ship with engine room and the cabins for the crew.

Routes and tours

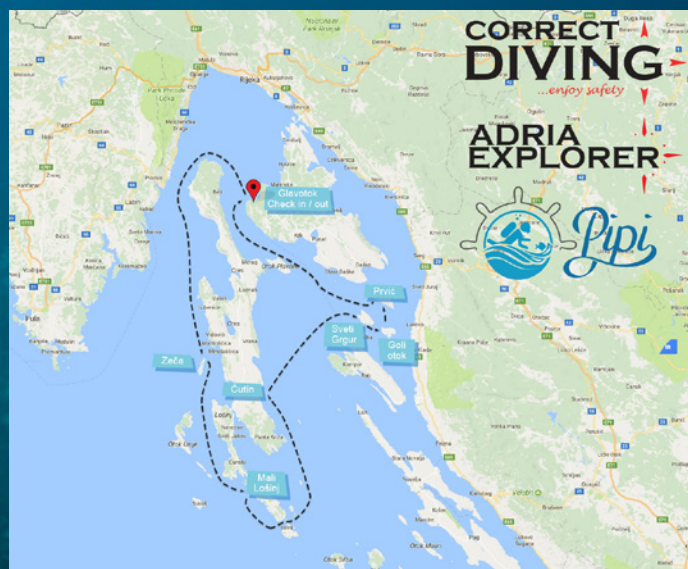

We have prepared some routes for you, which you can book in the package. Of course, we can also plan together with you an individual, tailored to your wishes route. Talk to us and you will find out how easy it is to work with us.

Wreck diving expedition (Peltastis, Elhawi Star, Sigrid, Vis, Lina)

Diving and sightseeing (Krk, Cres, Lošinj, Pag, Rab)

North tour in Kvarner (Krk, Cres, Lošinj, Rab, Goli otok, Prvić)

Our service center's services

- Service, maintenance, and repair of diving equipment - even from manufacturers who no longer exist
- Neoprene service - Replacement of zippers, neoprene sewing, etc.
- Production of customized neoprene suits in the in-house neoprene tailoring shop.
- Trocky service - Exchange of the cuffs, installation of urinators, search for leakages and exchange of dry zippers
- Compressor service (all manufacturers), sale, part exchange of diving compressors
- Sales of consumables for compressor systems: Molecular sieve, activated carbon, felt discs, oils, filter systems, etc.
- Modification of existing compressor units
- Production of storage facilities, filling ramps, cascades, pressure reduction equipment, lung automatic test benches (analog and digital), test pressure chambers, dive technique up to 450 bar
- Diving tanks service: Cleaning, drumming, sandblasting, visual inspection
- Hydrostatic tests up to 1000 bar
- Pressure chamber test up to 200 meters water pressure

MCH 16 compressor before the service

The same compressor after our service

Our kajaking center is at your disposal

For all those who love nature and want to experience it in peace and quiet, we also offer the rental of kayaks.

Our kayaks are suitable for use by absolute beginners and are very hard to tip over.

When renting our kayaks, you are getting a complete set of equipment, including paddles, containers for your personal belongings which should not get wet, life vests and safety instructions.

Never been kayaking? That's not a problem, a detailed briefing of the region with map material and a motivating kick is included in the rental fee.

Single, two and four seater kayaks for 50 people

Guided tours

Our young team will be happy to join your tour if you desire. We offer guided trips regularly. The specialty of these tours is how a trained eye can see everything. Birds, breeding grounds, dolphins, tuna hunting and much more.

During these tours, we will teach you about the beauty of the landscape. The tours last four hours and include a detailed briefing by the guide, issue of equipment, instructions on the kayaks. At the beginning, we do some training exercises with the kayaks in the sheltered bay. You always paddle along the coast and receive information from our guides. During the tour, we are visiting a beautiful bay where we can swim and have a snack break. For a guided marine biology introduction with snorkeling tour, you also get information about the fascinating underwater landscape.

With calm and quiet paddle strokes you go back to the adventure. An unforgettable experience for every individual and especially for your family.

What you need are swimming trunks, good will and if available snorkel equipment. You can also get snorkel equipment from us if you don't own one.

Isn't that a perfect thing for your group trip?

Children and youth programs

Our marine biology programs include:

- Marine biology programs lasting 2 hours to 5 days.
- For divers, diving schools, diving clubs, school classes and all interested parties
- Diving and snorkeling trips on the boat
- For your loved ones from 5 years of age
- Underwater educational trail

Sea Ranger

Our Sea Ranger program for children is an experience of a special kind. It is a schooling program in which we teach your little ones what life is like in the sea and what is in the bay in front of our center.

A program lasts only three hours and is an absolutely amazing experience for your kids. They will be discovering a brand new colorful and fascinating world, which is only a few centimeters below the water surface.

Each participant becomes a marine protector and receives a T-shirt as an award.

Snorkeling excursion with marine biology

Our program "Snorkeling excursion with marine biology" is a special program in which we bring the nature of the underwater world closer to your little ones.

They will learn about the anatomy of the fishes and how to better recognize and classify them. They'll learn about crabs, cuttlefish, sponges and many more.

Your loved ones will be under constant supervision from our well-trained team.

The only thing that you have to do is jump in the water with us, right at our doorstep, and the magic can begin.

Kayak excursion with sea biology

Quietly kayaking along the coast of the island of Krk is one of the most fascinating experiences. Slightly dip your paddles into the crystal clear, blue waters of the Croatian Adriatic and observe the animal world. During our excursions, we encounter dolphins, shoals, sea vultures, cormorants and their nests. Ride along the natural park and see fantastic things we would have overlooked with motor boats. Our guides will tell you everything about the relations between the wildlife in the sea. On this excursion, we make a swimming stop in a secluded and quiet bay where you have the possibility to learn about the marine life where you can be the discoverer of a fascinating new world. This program is also suitable for your school class travel. The duration is four hours and you only need bathing equipment, a towel, something to drink and if available - snorkeling equipment (rental possible).

Snorkeling excursion with the boat

Our program "Snorkel excursion with the boat" is a special program in which everyone interested in nature and the underwater world can participate. We drive to an adjacent island to one of the most beautiful snorkeling spots. Your children are accompanied by our well-trained dive assistants or instructors. The trip lasts three hours and you only need a towel, swimming or snorkeling equipment, and a good mood. If you do not have snorkel equipment, we will gladly provide it.

Archery

Our archery range services:

- Instructions
- Bow rental
- Equipment rental
- Organization of tournaments

Enjoy the aura of a historical adventure.

Let yourself be enchanted by the wonderful feeling of freeing the string and following the flight of the arrow

... Archery means fun, staying close to nature with the whole family. Together, you will experience team spirit and a fun competition will develop your relationship even further. Adults experience how valuable it can be to be a child once again. Give your children, partners, friends or colleagues unforgettable hours, which will enrich your experience!

Focus on your targets and make the right decision.

Our archery center offers you:

- Instruction in archery
- Rental of longbows
- Rental of arrows and additional equipment
- Targets at 10, 18, 30 meters away
